

Sirs:

Regarding the publication of the MITRE report as required by Docket 99-25 or LPFM ruling;

I urge the FCC to return to the original rules as proposed now that the interference level threat cited by NAB and other broadcasters has been disproven and shown by independant study to be FALSE. Since there has been PROVEN to be NO BASIS for the claim of interference from LPFM stations, the FCC should revise the rules without delay and without interference from lobbyists acting on behalf of interested parties to reflect the intent of the Docket: to provide for a broader citizen participation in broadcast ownership and practise AS RECOMMENDED without further studies by the MITRE Corporation.

In addition; the guard channels mandated by the FCC to appease broadcaster concerns should be REMOVED, since it has been proven to UNNESSECARY; and the original power limitation of 1,000 watts that was present in the original proposal should be RESTORED.

What the NAB and other broadcasters are scared of is that CITIZEN RADIO is almost ALWAYS MORE INTERESTING than BIG FORMATTED NATIONWIDE RADIO. I wish to note that I hold no obligation to ANY broadcast concern on either side of this issue, but that I do believe STRONGLY in citizen access to the nation's PUBLIC AIRWAVES which large brodcasters have attempted to stifle by their actions in lobbying Congress to interfere in these proceedings. Now that thier concerns have been PROVEN to be FALSE, DO THE RIGHT THING.
